EDUCATION | Bildungsweg

M.Sc. in Data Science, AI, and International Business Management,

GISMA University of Applied Sciences

Berlin, Germany | Expected October 2026

Coursework: Data Engineering, Data Analytics, Business Intelligence

Activities: Applied AI and Machine Learning with cloud-based data projects

Bachelors of Information Science and Engineering,

Visvesvaraya Technological University

Bangalore, India | 2019 - 2023

Final Year Project: Real-time Sign Language Detection using Python, OpenCV

SKILLS | Kenntnisse & Fähigkeiten

- Programming: Python, SQL
- ML/AI: Scikit-learn, TensorFlow, PyTorch, CNNs, RNNs
- Data Handling: Pandas, NumPy, OpenCV, Feature Engineering
- Visualization: Matplotlib, Seaborn
- Databases: MySQL
- MLOps Deployment: Data pipelines, Model Evaluation

EXPERIENCE | Berufserfahrung

Analyst full time ODA Class Bangalore,

Bangalore, India | Feb 2024 - Aug 2024

- Analyzed **10K+** student engagement and attendance records to uncover behavioral patterns **boosting class participation by 25%** and retention by **15%**.
- Processed **Mentor feedback** and conducted **A/B testing**, delivering actionable insights that improved teaching effectiveness by 30% and learning outcomes
- Built **ETL** pipelines and automated workflows with **Python (Pandas, NumPy)** and **SQL**, improving reporting efficiency by 50% and ensuring **reliable BI delivery**
- Designed interactive **Power BI & Tableau** dashboards, reducing manual reporting time by 40% and enhancing transparency of **performance metrics**.

PROJECTS

Bitcoin vs Nvidia stock price prediction

Developed a machine learning pipeline on the AG news dataset to classify news articles into 4 categories(World, sports, Business, Sci/tech). Conducted data preprocessing and exploratory analysis, engineered text-based features, and implemented supervised learning models to improve classification accuracy. Delivered insights into class distribution

GitHub-link:- <https://github.com/12-Mustafa/Nvidia-vs-bitcoin-prediction-.git>

Arabica Coffee Quality Analysis

Performed end-to-end analysis of Arabica coffee dataset (data cleaning, EDA, visualization, and business insights) to identify high-performing origins, varieties, and processing methods influencing cup quality.

GitHub-link:- <https://github.com/12-Mustafa/Coffe-Sourcing.git>

News category detection

Developed an AI-powered tool to analyze news, with the writing styles which generates a 97% accuracy. Using NLP models such as Transformers and compared with others models for the best accuracy.
