

PROFILE

Master's student in **Data Science, AI and Digital Business** seeking a **mandatory Data Analyst Internship** starting **April 2026**. Hands-on experience in **SQL-based data analysis, KPI reporting, and BI dashboards**, supporting **sales and customer retention teams**. Strong interest in data-driven decision-making within **Big Tech and large enterprise environments**.

Skills

Analysis : SQL (JOINS, GROUP BY, KPI calculations), Python (pandas, NumPy, data cleaning, exploratory data analysis), Descriptive statistics, trend analysis, basic A/B test interpretation

Data Visualization & Reporting : Power BI, Tableau, KPI dashboards, stakeholder-ready reporting, Matplotlib, Seaborn, PostgreSQL, MySQL, Excel (Pivot Tables, VLOOKUP)

Business Skills: Business requirements analysis, stakeholder communication, decision support & documentation

Languages: English: Fluent, German: A2 (currently learning)

PROFESSIONAL EXPERIENCE

Data / Business Analyst

ODAClass, Bangalore, India

Feb 2024 – Aug 2024

- Built and maintained **SQL- and Python-based reporting workflows** to support the **sales team**, enabling structured **weekly performance analysis** and KPI tracking.
- Designed **Power BI and Tableau dashboards** for business stakeholders to monitor **sales and customer retention KPIs**, reducing manual reporting effort.
- Supported **customer retention analysis** by identifying trends in historical data, providing **decision-support insights** that improved clarity in retention-related business discussions (~30% improvement based on stakeholder usage feedback).

SELECTED PROJECTS

Coffee Quality & Supplier Decision Analysis

- Performed exploratory data analysis and **clutter-free visualizations** to identify key factors influencing Arabica coffee quality scores.
- Created clear charts highlighting supplier-level quality differences and defect patterns.
- Delivered **actionable recommendations** on supplier selection and quality thresholds to support **data-driven procurement decisions**.

Market Performance & Risk Analysis (Crypto vs Equity)

- Analyzed historical performance of Bitcoin and NVIDIA stock to compare **trends, volatility, and correlation** across asset classes.
- Applied statistical and time-series techniques focused on **risk interpretation**, not prediction accuracy.
- Communicated findings through **data visualization and trend analysis** to support investment and risk-awareness discussions.

Sales KPI Analysis & Dashboard (SQL + BI)

- Built a structured **SQL-based analysis** using multiple tables to calculate core sales KPIs, applying **JOIN and GROUP BY** queries.
- Transformed transactional data into business-ready metrics for **performance monitoring**.
- Developed a **Power BI dashboard** emphasizing clarity, usability, and **decision support** for non-technical stakeholders.

EDUCATION

M.Sc. Data Science, AI, and Digital Business

GISMA University of Applied Sciences, Germany

Sep 2024 – Sep 2026 (Expected)

Focus: Data Analytics, Business Intelligence, Forecasting, Data Engineering Fundamentals

M.Sc. International Business Management (Dual Degree)

Kingston University London (via GISMA), UK

Sep 2024 – Oct 2026 (Expected)

Focus: Business Strategy, Operations Management, Business Consulting

B.E Information Science & Engineering

2019 – 2023

Final Project: Real-time Sign Language Detection using Python and OpenCV. Achieved **1st place** in Inter-collegiate AI Exhibition

Availability: Mandatory Internship (Pflichtpraktikum), 400+ hours | Full-time (40 hrs/week) | Eligible to work in Germany
